Mulberrys Garment Care chooses LED
High Bay product for its inspection
area.

“Our new LED light is like night and day.”

Scott Clemente, president,
Mulberrys Garment Care

Mulberrys is a private, Minneapolis-based company founded on the belief that garment care should be a craft not a commodity. Mulberrys uses crystal clear purified water and 100% toxin-free solvents to keep your clothes and your body chemical-free. An important part of Mulberrys business model is to hand finish and personally inspect every garment. Mulberrys is the only certified dry cleaner, environmental cleaner and winner of the Award of Excellence in the State of Minnesota.

Mulberrys was not happy with their existing fluorescent lighting in their inspection area of the cleaning facility. Inspection is an important part of Mulberrys service. Solus LED helped them with a LED solution that provides a crisper and more powerful light that uses only 100w of energy.

"In our business, effective lighting is the difference between delighting a customer or possibly losing them because we didn't see a stain on their garment at inspection. Our new LED light is (literally) like night and day from the old fluorescents we were using. The increased lighting enables our garment inspectors to be better at what they do and it is a great thing to be able to tell customers we are working on being even more energy efficient, " says Scott Clemente, president of Mulberrys.

Mulberrys will look to implement additional LED solutions as their business continues to grow in the Minnesota market.

Solus LED, LLC is a complete LED lighting solutions company and offers a broad product line manufactured by U.S. based Seesmart Technologies, Inc. to meet a variety of commercial and residential needs. Solus delivers a rapid return on investment, products backed by up to a seven-year warranty, free audit consultation services, immediate energy savings and true retrofit solutions.
